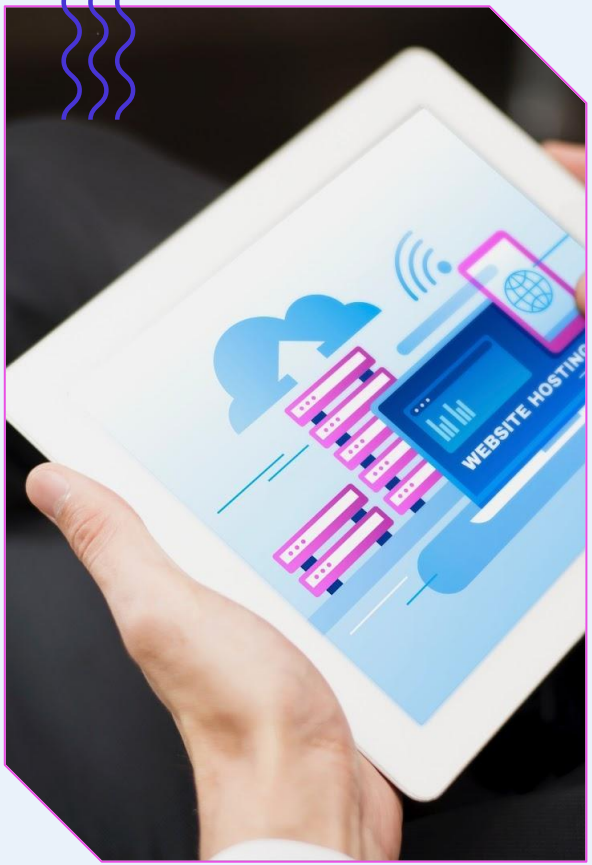
Zayan Najee



01

Introduction of the project

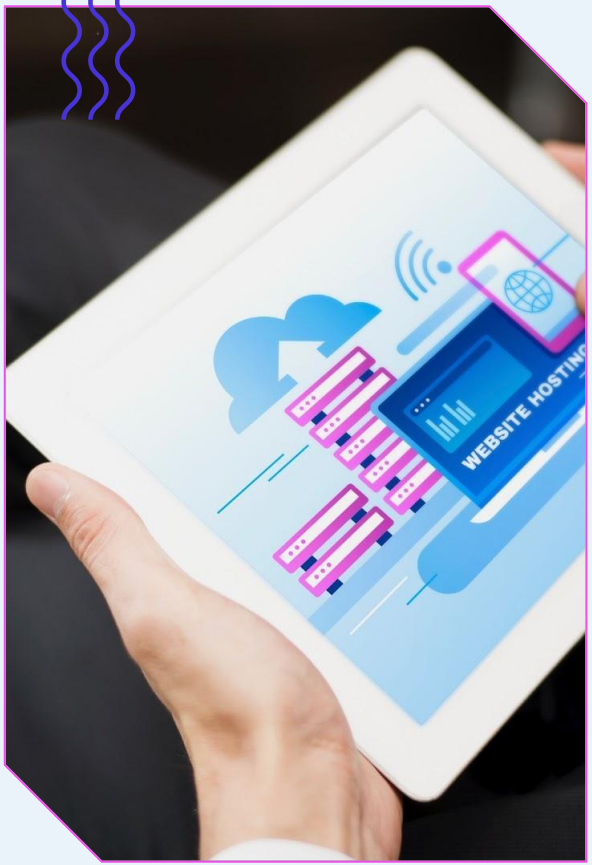
Introduction

What Is Flexwaves

- Dynamic and innovative organisation that aims to assist individuals in pursuing employment opportunities.
- Flex indicate Flexible in employment
- Waves indicate dynamic evolving job marketplace

Goal

To empower job seekers by providing a dynamic platform that not only matches skills with opportunities but also fosters personal and professional growth



02

Primary study of the project

Primary Study / Literature Research

SimplyHired.com

- Job search engine that compiles job ads from numerous websites.
- Features include resume posting, salary estimator and company reviews

Troopers

- Malaysian based job search engine that concentrates on flexible work
- Features include alert notifications, direct chat and a tracking system.

CareerBuilder

- Job search engine and employment website that connects job seekers with potential employers.
- Features include resume building, career resource articles and application tracking
